

Introduction to Adobe® Photoshop® CS4

The perfect class for anyone who needs to learn the basics of image editing, this *one-day* class focuses on Photoshop's most commonly used features. You will learn how to work with layers, use selection tools and techniques, adjust tonal range and color, add text to an image, retouch an image, and combine images.

Objectives:

- Navigate within Photoshop
- Set image size
- Adjust the tonal range and color balance of an image
- Display, arrange, and rename layers
- Copy layers from one image to another
- Add and modify type
- Use the selection tools
- Retouch images with the Clone Stamp and Healing Brush tools

Outline:

Overview of Photoshop

- The Photoshop family
- Raster vs. Vector
- RGB and CMYK

The Photoshop Work Area

- Use Adobe Bridge
- Navigate and zoom

Setting Image Size

- Dimension and resolution
- Set image size

Basic Image Correction

- Crop an image
- Adjust tonal range
- Remove a color cast
- Adjust brightness and saturation
- Apply the Unsharp Mask filter

Layer Basics

- Organize your artwork on layers
- Show and hide layers
- Select layers
- View the transparent area of a layer
- Rearrange layers
- Create a new layer
- Move layers from one file to another

Working with Selections

- Use the selection tools and commands to select parts of an image in various ways
- Create a layer from selected pixels

Repair an Image

- Use the Clone Stamp tool
- Use the Healing Brush
